AUSTRALIAN MADE ENVIRONMENTALLY FRIENDLY TOPS

TOP FINISHES 2025/2026

Transform commercial spaces with **Uplifting's Commercial range**, offering large corporates, architects and designers an array of innovative and sustainable options. Choose from a curated palette of Melamine, Laminate, Compact Laminate, crafted by Laminex and Polytec, to achieve the perfect aesthetic for any project while minimizing your environmental impact. Our standard 3600 x 1800mm sheets ensure accurate cost estimations across the range.

We also offer Luxboard which is a fully sustainable particleboard made of recycled-content of sustainable panel in Australia and distributed by the Luxmy Group, based in Sydney.

Create collaborative workspaces that inspire innovation, elevate the customer experience in retail environments, and design hospitality spaces that leave a lasting impression – all while making responsible material choices. Uplifting's Commercial range offers the versatility, quality, and eco-conscious solutions you demand.

Visit - [Uplifting Solutions](#) to explore the full range and download our latest brochure showcasing our commitment to sustainable design.

### REDIRECT - WOOD WASTE RECYCLING INITIATIVE

reDirect Wood Recycling will reclaim materials that would otherwise go to landfill, thereby reducing waste, preserving plantation pine forests and protecting the environment for future generations. The manufacturing of particleboard utilises recycled wood and off cuts in the production of new particleboard. By opting for wood off cut collection through reDirect Recycling we are assisting in creating sustainable manufacturing practices.

### GREEN TAG

Global GreenTag is a Product Sustainability Certification, Product Health & Environmental Product Declaration Program Operator relevant to all of the major green building rating tools in the world

### TIMBER CERTIFICATION

Laminex and Polytec support forest management and are committed to producing quality products from quality materials that are backed by globally recognised certifications. All materials are produced using wood fibres sourced from certified sustainably managed forests to Responsible Wood/PEFC (Programme for the Endorsement of Forest Certification) Certifications.

### AUSTRALIAN MADE

Australian-made provides confidence in the quality, integrity and sustainability of our products, where the resources and raw materials come from, and the way they're managed, where they are made by Australians, for Australians.

TABLE TOP AUSTRALIAN FINISHES

# Care & Maintenance.

For general care and maintenance, simply wipe away most spills or marks with a damp cloth, or use an all purpose cleaner such as Windex spray cleaner or Ajax Spray n Wipe. Rubbing gently with a clean, dry cloth brings back the brightness of laminates. With a few sensible precautions, your melamine surface will enjoy a long lifespan.

## GENERAL CARE - INFORMATION

- Avoid scourers and abrasives as they will damage the surface.
- Don't place hot objects, electrical appliances or pots straight from the oven or cooker onto your laminate surface.
- Don't cut on the laminate surface.
- Keep waxes and polishes well away as they dull the natural shine.
- Do not use strongly acidic, alkaline cleaners or bleach for normal cleaning as these might etch the surface.

## STREAKS

Streaky marks sometimes show on dark colours after cleaning. An all-purpose cleaner such as Windex spray cleaner or Ajax Spray n Wipe usually removes them.

## SPILLS

Laminex and Polytec surfaces resist staining from most household chemicals. However, with some accidental spills prompt action is essential. Wipe off beetroot, grape and berry juices, first aid preparations, concentrated bleach, oven cleaners, dishwasher detergents, artificial dyes, haircolouring and solvent-based pen ink immediately. Specialty glues such as Super Glue must also be removed straight away with acetone

## STAINS

If the stain won't budge with Extra Strength Windex, try methylated spirits or dab the stain with a diluted bleach mixture (1 part bleach to 8 parts water); leave for 3 minutes then wash off with water and dry. Finish off with Extra Strength Windex. Only as a last resort if a stain persists try 2 or 3 rubs with a creme cleanser or white toothpaste, wash and dry. Please note that bleach or these abrasive cleaners may irreversibly damage the laminate surface.

## SCRATCHES

Laminex and Polytec surfaces will withstand normal wear and tear, but can be damaged by scratching or cutting with utensils, knives and unglazed pottery. Darker colours will show scratches more readily than lighter colours. In general, dark colours and high gloss surfaces require more care and maintenance than lighter colours or lower gloss colours. To minimise scratching, always place and lift objects from the surface – never drag or slide them across the surface.
