

## Setup Instructions- Goanna Portable Laptop Tray

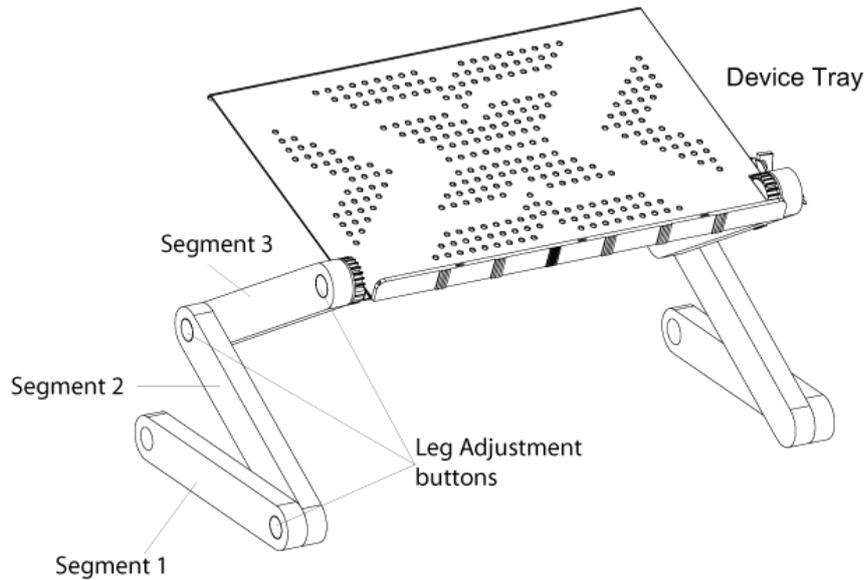

Versatile and adaptable, the Goanna Laptop Tray can be used in many different situations. On a desk, a sofa, or even in bed. The unique stepped leg design of the Goanna enables it to be adapted to many different positions. Whether working from home, travelling, or really working from anywhere, the Goanna can provide you with good ergonomics in many different situations.

**Setup Steps:**

The Goanna has 3 main parts (2 legs and 1 tray). Each leg has 3 segments. The legs are adjusted by pressing in on the silver adjustment buttons that are located between each segment.

Product Code: UP-G LR

**Adjusting the legs**

**Segment 1**

1. Locate the round silver adjustment button (which is flat against the surface) on segment 1.
2. Press and hold this button firmly with one hand while pushing the leg segment downwards. Ensure the button clicks into place.

Take note of the degrees you have set for this segment as you will repeat these steps for the opposite leg.

**Segment 2**

1. Locate the round silver adjustment button on segment 2.
2. Press and hold this button firmly with one hand while pushing the leg segment downwards. Ensure the button clicks into place.

Take note of the degrees you have set for this segment as you will repeat these steps for the opposite leg.

**Segment 3**

1. Locate the round silver adjustment button on segment 3.
2. Press and hold this button with one hand firmly, and move the tray to your desired location. Ensure the button clicks into place.

Take note of the degrees you have set for this segment as you will repeat these steps for the opposite leg.
